

Phase 9 — Reporting, Dashboards & Security Review

1. Reports

Salesforce provides different report formats to analyze data:

- Tabular Reports – Simple list of records. Example: All Leads created this month.
- Summary Reports – Grouped records with subtotals. Example: Leads grouped by Source or Counselor.
- Matrix Reports – Grouped by rows and columns. Example: Leads by Source vs. Owner.
- Joined Reports – Combine multiple report types into one view. Example: Leads and Enrollments for conversion tracking.

2. Report Types

- Standard Report Types – Provided by Salesforce (e.g., Leads, Accounts, Opportunities).
- Custom Report Types – Created for specific needs (e.g., Leads with Enrollments).

To Do List

4. Security Review

a. Sharing Settings

Setup → Sharing Settings → Organization-Wide Defaults (OWD). Example: Leads = Private, Contacts = Controlled by Parent. Sharing rules can be defined to give managers access to counselors' leads.

Batch	Public Read/Write	Public Read Only	✓
Course	Public Read/Write	Public Read Only	✓
Enrollment	Public Read/Write	Private	✓
Mentor	Public Read/Write	Private	✓
Student	Public Read/Write	Private	✓

b. Field Level Security

Controls visibility and editability of fields for profiles and permission sets. Example: On Course object, Fees__c field visible only to Admin/Manager, hidden from Counselors.

c. Session Settings & Login IP Ranges

- Setup → Security → Session Settings: Control session timeout, enforce HTTPS.
- Login IP Ranges: Restrict logins to specific IP ranges (e.g., office network).

d. Audit Trail

Setup → View Setup Audit Trail. Tracks last 20 changes in setup (e.g., field creation, validation rules). Useful for governance and

✓ Outcome

- Comprehensive reporting with tabular, summary, matrix, and joined reports.
- Dashboards created with key performance charts.
- Dynamic dashboards provide role-based visibility.
- Security implemented via OWD, FLS, IP restrictions, and audit trail.
- CRM is analytics-ready and secure for client use.

5. Sharing Settings

Control who can view or edit records. Options include:

- **Private** – Records visible only to owners.
- **Public Read/Write** – Open visibility and edit rights.
- **Role Hierarchies** – Access cascades upward to managers/admins.

6. Field Level Security (FLS)

Restricts visibility or editability of sensitive fields (e.g., student phone numbers may be visible only to admins, not tutors).

7. Session Settings

Define login session timeouts, security levels, and multi-factor authentication policies to strengthen system security.

8. Login IP Ranges

Restrict logins to trusted networks (e.g., only within office IP ranges), minimizing unauthorized access risks.

9. Audit Trail

Tracks configuration changes (who changed what and when). Useful for compliance and troubleshooting.
